RESEARCH PROJECTS

Lensless 3D Depth Imaging | 2023 - Now

- Keywords: Depth Imaging, PSF Engineering, Wave optics, SLM
 - Design a lensless camera for 3D imaging, enriching depth resolution with optimized phase masks forming multiple depth-dependent point spread functions using a spatial light modulator.

Lensless Snapshot Hyperspectral Imaging | 2021 - 2023

- Keywords: Hyperspectral Imaging, Linear variable filter, Calibration
 - Build a snapshot lensless imaging system that utilizes a linear variable filter and a phase mask to encode spectral information, enabling recovery of hyperspectral image stacks from a single measurement.

Lensless High Speed Eye Tracking | 2019 - 2021

- Keywords: Eye tracking, Wearable device, Rolling-shutter
 - Design and construction of a goggle-type eye tracker using a low-cost and highspeed lensless camera with rolling shutter image sensor for monitoring eye movements in neurodegenerative diseases.
